follow on learning	None applicable

surgery objectives

As a surgery's agenda is open, you can determine just what you want to get out of the day (or days). What you will end up with is a greater understanding in how EPM techniques and processes can best be managed. The surgery is an opportunity to build on the Microsoft project experience that you already have, fine-tuning and refining to make procedures more and more efficient.

sample agenda

- Understanding the EPM technical environment
- Understanding EPM data flows
- How to structure data within an EPM environment
- How best to utilise resources in an EPM environment
- How to define and structure EPM processes
- How to publish, capture actuals and replan remaining work
- How to structure EPM reports for particular groups of user
- How to configure EPM administration and security
